mLINQS Releases Enhanced System For Federal Relocation Expense Management

FAIRFAX, VA – (September 6, 2011) – mLINQS, LLC today announced the general availability of its newest version of moveLINQ v5. The version is available immediately for mLINQS software and Software as a Service (SaaS) customers. New enhancements accommodate updates to the Federal Travel Regulation (FTR), and user-recommended improvements to workflow and reports that further expand the awarding winning system’s capabilities to cost-effectively manage government relocation expense management.

“As always, our customers played an important role to determine which moveLINQ enhancements would produce the best results in the real world,” said Greg McIntyre, president, mLINQS. “It’s this interaction that has made moveLINQ the top choice for managing employee relocation expenses by federal agencies.”

For mLINQS SaaS customers, the hosted version of moveLINQ includes advanced administration features that agencies can use to significantly decrease their overall cost of relocation management. The system is available 24X7 in a federally-compliant IT infrastructure designed and maintained for Authority to Operate and Certification & Accreditation with agency requirements. All training, technical support and related application services are provided by mLINQS staff.

The new functionality developed for moveLINQ includes the following:

- Enhanced routing and workflow management with the ability to track agency reason codes
- Improved interface capabilities providing for new accounting validation and advice of payment
- New system reports for advance, voucher, and open authorization tracking
- More robust security controls
- Default system form enhancements
- Rule modifications to accommodate recent FTR changes

moveLINQ manages all of the expenses associated with federal employee relocation, and is the first and only fully compliant, Web-based government relocation expense management system. The system is currently used to support relocation for the employees of more than 30 federal agencies.
